

Short Essay on a Visit to a Science Exhibition

Fair is a place of fun and frolic. Fairs are held remove the dullness of life. But science fairs take place with a different purpose. Fun they do provide but their main object is to arouse interest in the student in the study of science to develop faith in modern technology and adopt scientific outlook in life.

I attended such fair in Ramjas senior secondary school, paharganj. All the rooms in which the fair was held were decorated with charts. The items selected newness and fascinated the visitors.

What interested me the most was the working of human body displayed and operated with electricity. The working of heart, digestive system and other organs of the body was really to the eyes. I returned home quite enriched in knowledge.
